

FineLine Continuous Hinge Shower Enclosure Systems General Specifications

Units: Shall be **FineLine** Shower Enclosures, as manufactured by **Peterson Shower Doors**.

Material: Structural sections shall be extruded aluminum, 6463 T-5 Alloy, R501 ("bright dip") finish. Glazing shall be safety tempered glass to meet the requirements of ANSI Z97.1-1975 and/or CPSC 16CFR1201-1 and 2.

Construction: Doors shall be constructed of extruded aluminum channel frames with 45 degree mitred corners fastened with stainless steel screws. Frame shall allow a minimum penetration of glass, set in extruded virgin vinyl channel, of 3/8" inch. Doors to feature integral continuous extruded aluminum hinge suspended on CNC machined aluminum bushings. Doors come framed, but are available with the option of 3/16" or 1/4" semi-frameless.
